WELCOME

from Brent Leisure, State Parks Director

Texas is blessed with a wide variety of public lands and a wealth of cultural heritage. Habitats thrive here. History comes to life. Every one of our state parks is part of a rich legacy, and every one of you plays a role in taking care of it for future generations.

These 630,000-plus acres showcase some of our state's greatest treasures. Parks help people find fun and relaxation. They also strengthen local economies and communities. Most of all, parks enable us to spend the kind of time in nature we all need to nurture our health and well-being.

We will celebrate our 100th anniversary in 2023. I invite you to get ready for this tremendous milestone by getting to know your parks. There are few better places to make great memories with friends and family.

The parks are here for you. They belong to you. Please come, enjoy, and help protect them for many years to come.

Meet the locals

You may see these and other species in their natural habitats when you visit. Many plants and animals depend on state parks to stay alive and thrive. With every visit, you help manage and conserve the rich biodiversity of Texas.

Scissor-tailed Flycatcher

This kingbird has a tail that doubles its body length. It perches in the open and flies out to catch insects in midair, also known as "hawking."

Beaver

A sleek and streamlined swimmer, this semiaquatic rodent assures its water supply and establishes its territory by building a dam and home of mud, rocks and wood.

Whether chasing down reptiles or fleeing from danger, this swift, animated cuckoo often runs instead of flying. Its X-shaped footprint helps conceal the

direction it is heading.

Shy, and mostly nocturnal, this cat has small tufts on the tips of its ears. Its ability to adapt to changing conditions has allowed this native species to thrive even in landscapes near urban areas.

Gray Fox

This elusive, mostly nocturnal mammal has a unique ability to climb trees to hunt or escape danger.

Badger

With a keen sense of smell second only to dogs, and an ability to dig faster than any mammal, these ferocious fighters will growl, snarl and emit a scent if provoked. They often compete with coyotes for food and are unaffected by snake venom unless struck on the nose.

What are State Natural Areas?

These sensitive ecosystems are some of the most valuable native habitats you can visit on public lands in Texas, and they need your help to stay healthy. Please expect more nature, fewer developed facilities and different hours of operation.

Bottlenose Dolphin

One of over 20 cetacean species found on the Texas coast, these curious, intelligent mammals have stout bodies, short beaks and erect dorsal fins.

To help keep wildlife wild. please maintain a safe, respectful distance.

Black-tailed Prairie Dog

These heavy-bodied rodents live in towns divided into wards and coteries. Family members greet each other with bared teeth and "kiss" as a form of recognition.

Fishing in the park's lake is great for largemouth bass. The park is home to a variety of wildlife and is a popular spot for migratory birds and butterflies. And, as the exit sign says, Regrese Pronto – Y'all Come Back Soon!
