# Update From WDFW

### Message from the Director and Commission Chair

Seasoned anglers will notice several changes to this year's sportfishing rules pamphlet. Based on public feedback, we have attempted to make some of our complex fishing regulations easier to understand. Primarily, anglers should be aware of changes to regulations for freshwater species – such as steelhead, trout, and warmwater fish – in the state's rivers, streams, and lakes.

For example, we've reduced the number of exceptions to the year-round lake season and eliminated mandatory steelhead retention in most places. We have also standardized the daily limit and minimum size requirements for bass, walleye, and channel catfish in the Columbia River (downstream of Chief Joseph dam) and its tributaries. This change aligns regulations for several rivers in most of the region.

Additionally, we've made an effort to clearly describe regulations in each river section. In some cases, that means we've specified rules for many additional smaller sections of a river that are different than the sections anglers are accustomed to.

These improvements are captured not only in this pamphlet but also in our new Fish Washington sportfishing rules mobile app, which is free to download. The app allows anglers to find fishing opportunities nearby, provides details on harvest limits and allowable gear for fishable species in each waterbody, and provides locations of boat launches and other fishing access points.

We hope our efforts to make regulations easier to understand will inspire you to gather up your family and friends and head out to your favorite fishing spot this year. There are plenty of excellent fishing opportunities available throughout the state.

It should be another great year of fishing in Washington.

Good luck!

Joe Stohr, Director, Washington Department of Fish and Wildlife

# Statewide General Rules\*

# Harvest and Possession Rules

## You May:

- Clean or portion fish or shellfish while in the field with the following exceptions: It is unlawful for an angler to fail to retain proof of compliance with species, size, number, weight, sex, or wild or hatchery origin restriction, if such restrictions apply, until the angler is ashore and has finished fishing for the day. For all rockfish species and for fish with a length restriction, anglers must retain the fish carcass until coming ashore to comply with the above rule. This does not apply if the catch is in the process of being prepared for immediate consumption.
- · Use a rodholder.
- Leave your rod in a rodholder while playing or landing a fish if the rod can be easily removed from the holder.
- Use an electric powered reel attached to a pole.
- Use a downrigger if the line releases from the downrigger while playing or landing the fish.

# You May Not:

- · Fish in closed waters.
- Retain wild STEELHEAD.
- Retain DOLLY VARDEN/BULL TROUT except where specially authorized in the special rules.
- · Retain GREEN STURGEON.

- Fish for, retain, or possess EULACHON (Columbia River Smelt) unless specifically open under emergency regulation.
- Fish for, or harvest fish or shellfish in an area with catch in your possession that does not meet the rules of that area. However, you may pass through such an area without stopping to fish. Also, you may catch fish in one area and land them at a port in a different area even if that different area is closed or has different rules, with the exception of landing HALIBUT in a closed area, or landing BOTTOMFISH caught in Oregon (see page 98). Additionally, see Fish and Shellfish caught in Canada (same page).
- Intentionally waste fish or shellfish. This includes mutilating or clipping fins and then returning to the water any live fish (such as DOGFISH).

- Continue to fish for SALMON after the adult portion of the daily limit has been retained.

- Remove eggs from a salmon to use or preserve them for bait without retaining the carcass from which the eggs were removed.
- · Transport live fish without a permit.
- Possess fish or shellfish that do not meet the minimum and maximum size limits, weight limits, or sex restrictions, or that are in excess of the daily or possession limit.
- Possess STURGEON eggs in the field without having retained the intact carcass of the fish from which the eggs were removed.
- Possess DOLLY VARDEN/BULL TROUT in the field in such condition that the species and total length cannot be determined.

- Hold recreationally-caught fish or shellfish in storage by a custom canner, hotel or restaurant, or a cold storage plant without tags listing the name and address of the owner of the fish or shellfish.
- Trespass on private property (which often includes the bed of a stream) regardless of whether there is an open season.

# You are Required to:

- Cooperate with data collection or other sampling of fish, shellfish or SEAWEED upon request of Department of Fish and Wildlife personnel. This includes relinquishing any part of a SALMON, STEELHEAD, or other species of fish containing coded-wire tags.
- Stop at mandatory check stations established by the Department of Fish and Wildlife.
- Show fish, shellfish, and SEAWEED in your possession and required licenses, Catch Record Cards, and gear being used, upon request of a Fish and Wildlife officer.

# Buying and Selling Fish & Shellfish

You may not offer any recreationally-caught fish or Shellfish for sale or barter.

In order to buy, sell, or possess STEELHEAD, sea-run CUTTHROAT, or DOLLY VARDEN/BULL TROUT lawfully taken by a treaty Indian member: the fish must be accompanied by a written statement showing taker's name, address, tribal affiliation, and treaty fish identification card number, number of fish, date, and location where taken. This rule does not apply to treaty members nor to Game Fish purchased from a fish buyer licensed by the Department of Fish and Wildlife.

# Gear Rules

# You May Not:

- · Snag or attempt to snag fish.
- Use a net, except a dip net to land legallyhooked fish, a forage fish dip net, or in Marine Areas 1-4, a forage fish cast net for SARDINE and ANCHOVY only.
- Use drugs, explosives, or poison that may kill or injure fish and wildlife.
- Use any type of chemical irritant to harvest fish, or shellfish unless a special exception has been made by the Director.
- Fish with a rod not under your immediate control, or leave your gear unattended.
- Fish for Game Fish, SALMON, STURGEON, SHAD, OCTOPUS, CRAB, or other shellfish with bow and arrow, spear, or spearfishing gear unless authorized by Special Rules.
- Use a gaff hook, except to land LINGCOD (in Marine Areas 1-3 and 4 West of Bonilla-Tatoosh line), HALIBUT, TUNA, or DOGFISH shark that will be retained.
- · Use a HERRING rake or a SMELT rake.
- · Use a crossbow to harvest fish or shellfish.

# Fishing in Canadian Waters

In determining the location of the U.S./Canada border, U.S. (not Canadian) navigation charts apply to anglers fishing from vessels registered in the State of Washington.

# Fish and Shellfish Caught in Canada

It is lawful to possess Canadian-origin fish or shellfish if you have a Canadian license and salmon conservation stamp (for SALMON), except it is unlawful to possess Canadian-origin YELLOWEYE or CANARY rockfish.

There are special rules for Canadian HALIBUT and SALMON. If you only fish in Canada, contact the Department of Fisheries and Oceans (DFO) or visit their website at <a href="https://www.dfo-mpo.gc.ca">www.dfo-mpo.gc.ca</a> for updated Canadian regulations. If you fish for HALIBUT in Washington, the daily limit is one HALIBUT, and the possession limit is two HALIBUT, regardless of where they are taken. No more than one daily limit of HALIBUT may be possessed aboard the fishing vessel.

You may **not** land both a Canadian and a Washington limit of SALMON on the same day (one or the other, but not both).

this unlawful to possess in marine waters, or deliver into Washington, any fresh SALMON taken for personal use from Canadian waters, unless such SALMON meet current regulations for the waters of the applicable Washington Catch Record Card area. However, anglers aboard a vessel may deliver Canadian-origin SALMON into Washington that are lawfully taken in Canada, regardless of whether the SALMON meet the current regulations for the area where delivered, provided anglers meet trip notification requirements. See https://wdfw.wa.gov/licensing/canadian\_catch.php.

Anglers are subject to WDFW Enforcement and dockside sampling inspection when landing Canadian catch in Washington waters.

# **Salmon and Trout Handling Rules**

FRESHWATER: "It is unlawful to totally remove salmon, steelhead, or Dolly Varden/Bull Trout from the water if it is unlawful to retain those fish, or if the angler subsequently releases the salmon, steelhead, Dolly Varden/Bull Trout." EXCEPTIONS:

- The Columbia River between the Buoy 10 line and the Rocky Point/Tongue Point line
- The Columbia River from the Rocky Point/Tongue Point line upstream to Hwy. 730 OR/WA border the rules apply only when fishing from vessels less than 30 feet in length during Feb. 15-June 15.

MARINE AREAS 5 through 13: "It is unlawful to bring wild salmon or a species of salmon <u>aboard</u> a vessel if it is unlawful to retain that salmon" ("aboard" means inside the gunwale of a vessel).

**MARINE AREA 2-2:** "It is unlawful to totally remove salmon from the water if it is illegal to retain those fish, except anglers fishing from boats 30 feet or longer as listed on either their state or Coast Guard registration, are exempt."

## How to Release Fish

When you need to release a fish, there are some special precautions you can take to give it the best chance of surviving:

- Minimize handling by leaving the fish in the water.
- Do not net your fish but if you must, use a soft, knotless net or rubber mesh net. Knotless nets are now required in fly-fishing only areas and freshwater areas with selective gear rules.
- Use a hook remover (dehooker) when hooks are imbedded in the mouth or jaw.
- · If a fish has swallowed the hook, cut the leader.
- · Keep fingers away from the eyes and gills of the fish.

## **Selective Fishing**

Selective fisheries for hatchery-produced fish and catch-and-release fisheries are increasingly important to providing recreational fishing opportunities in Washington. To ensure these fisheries are successful, it is absolutely essential that participating anglers comply with all regulations and take great care in releasing unmarked fish to ensure the greatest chance for survival.

Photo shows the proper technique of releasing a fish with a dehooker without bringing the fish aboard the vessel.

# Youth Fishing

WDFW strongly supports and promotes youth fishing. Everyone 15 years of age and older must have a license. Children 14 years of age and under do not require a license though are still required to hold a valid catch record card where applicable. They must actively participate and be able to demonstrate the ability to handle the gear by themselves. They must follow all the rules and restrictions for that particular species and/or body of water, and are allowed the same daily limit as an adult. Adults may assist and are not required to have a license if they will not be fishing/harvesting themselves, but children must be present and take part in the entire process.

# Catch Record Cards

The Catch Record Card is an important management tool for estimating the recreational catch of sturgeon, steelhead, salmon, halibut, and Puget Sound Dungeness crab. A catch record card must be in your possession to fish for these species. Washington Administrative Code (WAC 220-56-175, WAC 220-69-236) requires all kept sturgeon, steelhead, salmon, halibut, and Puget Sound Dungeness Crab to be recorded on your Catch Record Card, and requires all anglers to return their fish Catch Record Card by April 30, or for Dungeness crab by the date indicated on the card, even if nothing is caught or you did not fish. Please use the instruction sheet issued with your card. Please return Catch Record Cards to: WDFW CRC UNIT, PO BOX 43142, Olympia WA 98504-3142. Use examples below to help complete your card correctly. DO NOT RECORD RELEASED CATCH. For Catch Record Card Information call (360) 902-2707.

# Other General Information

# **Sportfishing Rule Development**

For information on upcoming sportfishing rule development, please visit our website at <a href="https://wdfw.wa.gov">https://wdfw.wa.gov</a>. The website will have information on the schedule, how you can participate, and the types of rule changes we will be considering. In addition, you can sign up to receive fishing rule changes and regulatory focused news releases at <a href="https://wdfw.wa.gov/lists/">https://wdfw.wa.gov/lists/</a>.

# Fish Tagging Notice

Researchers throughout the state have released fish including sturgeon, with PIT tags (small glass-encased microchips) injected into the muscle just behind the top of the head. The tag doesn't need to be returned, but check for the presence of a tag if the fish is to be consumed.

Several state and federal agencies (including WDFW), universities and Indian tribes also have released salmon, steelhead, sea-run cutthroat trout, and various marine fish species with small acoustic tags in their body cavities. These tags transmit signals that are picked up by special receivers, allowing fishery managers to track the fish. Anglers who find a tag while cleaning their catch should call (360) 902-2700 to report the tag number, species of fish, date and location of their catch.

# **Special Use Permit**

Anglers with "WDFW Disability Status" (see page 7) may apply for a "Special Use Permit" to accommodate their fishing activities. Special Use Permits are customized on a case by case basis to the individual's particular need. For more information, go to: wdfw.wa.gov/accessibility/special\_use.html

# **Anti-Snagging Rule Examples**

# Prohibited Aquatic Species

It is illegal to transport, introduce, or use prohibited aquatic animal and plant species, unless specifically authorized. WDFW encourages citizens to be vigilant in preventing the introduction or spread of prohibited and other non-native species. To report sightings and learn more about what you can do, please call toll free 1-888-WDFW-AIS. For more information on Aquatic Invasive Species, go to <a href="https://wdfw.wa.gov/ais">https://wdfw.wa.gov/ais</a>.

# Co-Management

Washington's natural resources are managed cooperatively by the state of Washington and Indian tribes, whose rights were established in treaties signed with the federal government in the 1850s. In those treaties – considered the "supreme law of the land" under the U.S. Constitution – the tribes reserved rights to hunt, fish and gather shellfish and plants in traditional harvest areas.

In Washington, there are 29 federally recognized Indian tribes. Each has hunting and fishing rights within their reservations. Of these tribes, 21 also possess off-reservation hunting and fishing rights. Two tribes in Oregon and one in Idaho also have treaty-reserved rights to hunt and fish in the state.

These tribes and the state consult through a variety of co-management forums to develop joint natural resource management agreements through a shared commitment to meet one another's objectives. The long-term health of natural resources depends on the tribes and state working cooperatively to achieve common goals.

For more information on the tribes, visit the Governor's Office of Indian Affairs at https://www.goia.wa.gov/.

# License Suspensions and Property Forfeitures

Washington State's Fish and Wildlife Enforcement Code (Revised Code of Washington Chapter 77.15) requires the **mandatory** suspension of a person's fishing privileges, for up to five years, if a person is convicted of one of the following violations:

- assaulting a Fish and Wildlife Enforcement Officer, or an employee or agent of the Department performing official duties
- · first degree waste of fish and wildlife
- · harvesting endangered fish or wildlife
- · unlawfully purchasing or using a license

In addition, repeat offenders (any person with three convictions for any kind of violation within ten years) receive a mandatory two-year suspension of all fishing and hunting privileges. The law treats an uncontested notice of infraction, a finding of "committed" on an infraction, or a guilty plea as a conviction that will count toward a potential suspension. You will permanently lose your fishing and hunting privileges if you hunt or fish on a suspended license or face a lifetime or longer term suspension if a violation demonstrates a willful or wanton disregard for the conservation of fish or wildlife. Furthermore, property that is used to violate any fishing and hunting regulations, or that is held with the intention of committing a violation, may be seized for evidence and may ultimately be forfeited to the state.

# Statewide Freshwater Rules

# Using Freshwater Rules

**1** • • • • Read:

The Statewide Freshwater Rules and Statewide Freshwater Species Rules (pages 14-15). Determine seasons and general rules applying to the species for which you intend to fish.

**?** • • • • Check Special Rules for your location:

Special Rules (pages 17-94), list areas where the Statewide Rules have been modified. These are divided into multiple areas: Puget Sound and Coastal Rivers, Columbia Basin Rivers, Westside and Eastside lakes. **RIVERS** lists rivers, streams, and beaver ponds. **LAKES** lists lakes, ponds, and reservoirs. For the purposes of this pamphlet, the COLUMBIA and SNAKE RIVERS are rivers (not reservoirs), and any Special Rules that apply are listed in the Columbia Basin section.

If a freshwater area is not listed in Special Rules, follow the Statewide Freshwater Rules.

**3** • • • • Check for Emergency Rules:

Which can be found by calling the WDFW Fishing Hotline at (360) 902-2500, by contacting statewide customer service at (360) 902-2700, or by visiting the WDFW website at https://wdfw.wa.gov.

# Statewide Freshwater Rules

The following Statewide Freshwater Rules and seasons apply (pages 14-15) unless listed otherwise in the Special Rules (pages 17-94).

# Areas/Seasons

Areas listed within Special Rules (pages 17-94), show <u>ALL</u> Game Fish and SALMON fishing opportunities for the specific area listed.

All freshwater areas are <u>CLOSED</u> to the harvest of any fish not classified as a Food Fish or Game Fish (see definitions page 10) except for NORTHERN PIKE.

Freshwater areas are open 24 hours per day when open.

All freshwater areas are <u>CLOSED</u> to fishing for SALMON, DOLLY VARDEN/BULL TROUT, LAMPREY, and GRASS CARP.

Fishing for COMMON CARP, SHAD, or FORAGE FISH is open only during open Game Fish or SALMON seasons.

LAKES, PONDS, and RESERVOIRS are <u>OPEN</u> to fishing for Game Fish (except DOLLY VARDEN/BULL TROUT and GRASS CARP) year-round.

RIVERS, STREAMS, and BEAVER PONDS are OPEN the Saturday before Memorial Day through October 31.
Beaver ponds located within or connected to streams listed as open to TROUT and Other Game Fish follow the same rules as the stream.

# Tackle

Hook and line angling only. Barbed or barbless hooks may be used, and a hook may be single-point, double, or treble, but not more than one line with up to three hooks per angler may be used.

Single-point barbless hooks are required in areas designated as "fly fishing only" or "selective gear rules."

All fishing gear must be kept in immediate control and may not be left unattended while fishing. Rodholders may be used, but the rod must be easily removed without delay; rod may be left in holder while playing the fish.

A club or dipnet may be used to assist landing a legal fish taken by legal gear. A qaff hook may not be used.

It is unlawful to possess a fish taken from freshwater that was not hooked inside the mouth or on the head. The head is defined as any portion forward of the rear margin of the gill plate.

# **Bait Rules**

It is unlawful to chum, broadcast, feed, or distribute into freshwater any bait or other substance capable of attracting fish unless specifically authorized in Special Rules.

Where use of bait is prohibited, or where lures or flies are used voluntarily, Game Fish may be caught and released until the daily limit is retained.

It is unlawful to possess or use live aquatic animals as bait, except:

- Live aquatic animals (other than fish) collected from the water being fished.
- 2. Live sand shrimp.

# **Special Rules Instructions**

The Special Rules (pages 17-94), list freshwater areas where the Statewide Rules have been modified.

Unless otherwise listed in the Special Rules, you must follow the Statewide Rules.

Areas listed within Special Rules, show ALL Game Fish and SALMON fishing opportunities for the specific area listed.

Common regulation terms and definitions can be found on pages 10-11.

The terms "TROUT", "All Game Fish", and "Other Game Fish" include the TROUT and Game Fish species on the definitions pages 10-11, except DOLLY VARDEN/BULL TROUT and GRASS CARP.

When Landlocked Salmon rules apply, landlocked ATLANTIC, COHO, and CHINOOK SALMON are regulated as TROUT. See definition page 11.

County references after lakes or streams are noted to make it easier to locate the waters listed, or to differentiate between two places with the same name. They do not mean that the rules apply only to the portion of water in that county.

In Grant, Adams, Okanogan, and Douglas counties, you may fish up to the base of all man-made dams or other obstructions (in listed and unlisted areas), except Zosel Dam.

Lakes with this icon have a public boat ramp.

Lakes with this icon are excluded from the Two-Pole Endorsement.

Waters annotated with:

Col. R. Salmon/Steelhead Endorsement, require a Columbia River Salmon and Steelhead Endorsement when fishing for SALMON or STEELHEAD. See:

 $https://wdfw.wa.gov/licensing/crss\_endorsement\\$ 

Waters annotated with:

Barbless hooks required for Salmon/Steelhead, require the use of barbless hooks when fishing for SALMON and STEELHEAD within the Columbia River and its tributaries.

### **Tips to Reduce Contaminants**

- Eat a variety of fish from a variety of sources

# Trout Identification

### Steelhead

Steelhead are ocean-run rainbow trout that run in both summer and winter seasons, returning after one to three years at sea.

#### **Bull Trout**

**Dolly Varden** These fish are olive green to brown above and on the sides with no wormlike markings. There are cream or pink spots. The tail is slightly forked. Dolly Varden are typically smaller and are only found in a few headwater streams in Western Washington. Bull trout have a longer jaw and are found in Eastern and Western Washington and may also be encountered in marine waters.

#### **Eastern Brook Trout**

Dark green or blue with white belly which may become a vibrant orange as the fish nears spawning. Its upper body and dorsal fin have wormlike markings. Its sides have yellow and pink spots with blue rings. The lower fins are white-tipped and the tail is square.

#### **Rainbow Trout**

Body color is variable and may be silvery in lakes and reservoirs. Numerous closely grouped spots on dorsal fin and tail. The maxillary (upper jaw bone) does not usually extend beyond the back of the eye.

# **Brown Trout**

This trout's back is brown or olive with large spots. Sides are light brown toyellowish with large dark spots surrounded by halos of blue-gray. The tail has few spots.

## Westslope Cutthroat Trout

Body color is variable. Numerous closely grouped spots towards the dorsal fin and tail. The maxillary (upper jaw bone) usually extends beyond the back of the eye. Red or orange slash on the underside of the jaw.

### Yelloweye Rockfish

Orange-red to yellow body color, bright yellow eye, and fins may be tinged with black. Raspy ridges above eye, rear of anal fin vertical. Also called rasphead rockfish and red snapper. Typically the largest species of rockfish.

### **Black Rockfish**

Body black or grey in color. Also called seabass and black bass. Large mouth, rounded anal fin.

Body variable in color with light colored stripe along the rear of the lateral line. Two dark bars radiating from eye.

### Blue/Deacon Rockfish

Body is blue or black. Forehead has several diagonal bars. Has a small mouth. The anal fin is vertical or slanted posteriorly.

### Yellowtail Rockfish

Olive green body with yellow-green fins. May have knob at tip of lower jaw. Rear edge of anal fin vertical.

### Vermilion **Rockfish**

Body dark red and mottled gray. Red mouth and underside of jaw is rough. Fins may be edged with black. Anal fin rounded.

# **Salmon Identification**

# OCEAN PHASE

### **Chinook Salmon**

<u>Large black spots</u> on back, dorsal fin, and both the upper and lower lobes of the tail. Black mouth with a <u>black gum line</u> and large prominent teeth. Silver pigment on the tail.

### Coho Salmon

<u>Black spots on back</u> with spots only on the upper portion of the tail. White mouth with a <u>white gum line</u>, a dark tongue, and medium-sized teeth. Average size scales. Silver pigment on the tail.

### **Chum Salmon**

No prominent spots on back or tail (small speckles may be present). White mouth with a white gum line, a dark tongue, and well developed teeth. Calico markings (vertical bars), but faint on bright fish. Silver pigment on the tail.

### **Pink Salmon**

Generally large black spots on back and heavy <u>oval shaped black blotches</u> on the upper and lower lobes of the tail. White mouth with a black gum line and tongue. <u>Very small</u> scales. <u>No silver pigment</u> on the tail. Few if any teeth present.

### Sockeye Salmon

<u>No prominent spots</u> on back or tail (small speckles may be present). White mouth with a <u>white gum line</u>, a dark tongue, and almost toothless. Average size scales. Prominent gold-colored eyes. No silver pigment on the tail. Small teeth.

### **Chinook Salmon**

Chinook salmon do not display the conspicuous morphological changes of pink, chum and sockeye salmon during the spawning stage. Typically Chinook turn from silvery bright ocean coloration to a darker bronze color. <u>Large spots</u> are found on the back and both lobes of the tail. Mouth is black with a <u>black to grey gum line</u>.

### Coho Salmon

Mature coho salmon display a greenish-black head with a red to maroon colored body. Spots are found on the back and only <u>upper lobe</u> of the tail. The mouth is black with a <u>white gum line</u>. Typically male coho display brighter coloration and have a more pronounced elongated hooked snout.

### **Chum Salmon**

Chum salmon display characteristic <u>olive-green vertical markings</u> on the sides of the body as they approach spawning. There are no spots on the back or tail. Male chum salmon develop a more elongated snout with large canine-like teeth and also have reddish-purple vertical markings in addition to the olive-green markings.

### Pink Salmon

The majority of pink salmon return on odd-numbered years. Pink salmon have large oblong spots on the back and both lobes of the tail. Pink salmon, like most other salmon transform from silvery bright ocean coloration to a more dull and darker color. Males develop a pronounced hump as they approach spawning.

### Sockeye Salmon

Sockeye turn <u>brick red to scarlet red</u> along their body with a greenish head. Female coloration is often more dull colored. There are <u>no distinct spots</u> on the back or tail. Sockeye can be found spawning in both lakes, streams, and rivers, while other Pacific salmon spawn in streams and rivers.

# Atlantic Salmon

Male Atlantic salmon

Female Atlantic salmon

Atlantic salmon have large black spots on the gill covers and back, and rarely any spots on the tail fin. Their scales are large, there is no red stripe along the lateral line, and they have 8-10 anal fin rays. Atlantic salmon may be taken from marine waters during any open salmon season, and from anadromous (not landlocked) freshwater during any open salmon or trout season. Anglers may not, however, continue to fish for Atlantic salmon after a daily limit of another species of salmon has been retained. In landlocked lakes, Atlantic salmon may be taken as part of the trout daily limit. Seasons and size limits in place for trout apply to Atlantic salmon in landlocked lakes. Opportunities to harvest Atlantic salmon beyond those listed in the pamphlet will be announced to the news media and carried on WDFW's recreational fishing hotline. Please report sightings to (360) 902-2700.

# Chinook, Coho, and Pink Salmon Identification

### Chinook

Jaw- dark mouth and black gums at the base of its large, sharp teeth. Immature Chinook are known as a "blackmouth."

Tail- both the upper

and lower lobes of

the tail are covered

with spots and

### Coho

Jaw- mouth is white and the gum line is almost white, but the tongue may be black. The medium-sized teeth are sharp.

### Pink

Jaw- mouth of a pink is white, but the gums and tongue are black, as they are in a Chinook. It does not have "teeth" on its tongue.

Tail- has just a few scattered spots. usually on the upper lobe, with silver streaks. Base of tail is wide.

### Tail- is covered with large oval spots. It does not have silver on the tail. The scales are very small compared to other salmon.

# Wild/Hatchery Identification

In order to provide salmon and steelhead fishing opportunities, WDFW and the Tribes have marked salmon and steelhead by clipping the adipose fin (a small fatty fin directly behind the dorsal fin). In areas designated "release wild <insert fish name>", fin-clipped salmon and steelhead are the only fish that may be retained. The picture to the right shows a wild salmon and a fin-clipped or hatchery salmon. Please be careful in releasing wild fish- they are your fishing future! For tips on the best way to release fish, please see page 5. In Marine Areas 5-13, it is illegal to bring a wild salmon or a species of salmon aboard a vessel if it is unlawful to retain those salmon. "Aboard a vessel" is defined as inside the gunwale. In Marine Area 2-2, it is unlawful to totally remove salmon from the water if it is illegal to retain those fish, except anglers fishing from boats 30' or longer are exempt. Learn more by visiting:

https://wdfw.wa.gov/fishing/salmon/identification.html

**Hatchery Salmon** Adipose fin has been clipped - leaving a healed scar in its place.

Wild Salmon Intact adipose fin.

# Marine Area Rules

Season and Daily Hours:

During an open season, marine waters are open 24 hours per day, except as noted for night closures.

**Z** • • • Quota Management:

SALMON, HALIBUT, and some SHELLFISH are managed by quotas in many marine areas. These fisheries close when the quotas have been taken. Closures will be announced to local news media and will be included in the Fishing Hotline and Shellfish Rule Change Hotline messages.

**NOTE:** Emergency rules may occur throughout the year and will supersede the rules contained in this pamphlet. Changes can be found by calling the WDFW Fishing Hotline (360) 902-2500 or Shellfish Rule Change Hotline (866) 880-5431, contacting statewide customer service (360) 902-2700, or by visiting the WDFW website <a href="https://wdfw.wa.gov">https://wdfw.wa.gov</a>.

Rules listed below are General Rules. Specific Area Rules are listed by area (pages 100-123).

# **Species Rules**

Hatchery **STEELHEAD** may be caught and released until the daily limit is retained. If a fish has swallowed the hook or is hooked in the gill, eye, or tongue, it should be kept if legal to do so. Wild STEELHEAD must be released.

SALMON - Single-point barbless hooks and a hand-held rod and line must be used. In Areas 5-13, it is illegal to bring a wild SALMON or a species of SALMON aboard a vessel if it is unlawful to retain those SALMON. "Aboard a vessel" is defined as inside the gunwale. Also see special Handling Rule for Area 2-2 east of the buoy 13 line.

WHITE STURGEON - Only one single-point barbless hook and bait is allowed when fishing for STURGEON. Catch-and-release open year-round. Green STURGEON may not be retained.

HALIBUT - Hook and line angling and spearfishing only. A hand-held line is permitted. Only one line with up to two hooks may be used. HALIBUT may be shot or harpooned while landing. May not be landed in a port closed to HALIBUT fishing except HALIBUT lawfully caught in Canada; angler must have Canadian license. See page 4, Fish & Shellfish caught in Canada

# Dereliet Fishing Gear

# Report lost or abandoned commercial nets or pots

There are no penalties associated with reporting lost commercial fishing gear.

The Derelict Fishing Gear Removal Project is a no-fault program. The goals are simply to remove lost and abandoned commercial gear, to help restore Puget Sound, to improve public safety, and to assist species recovery.

Nets are dangerous! Never attempt to remove them. Divers, stay a safe distance away.

### Still Fishing After All These Years

Lost and abandoned commercial fishing gear continues to fish, impacting marine animals and destroying their habitat, entangling divers, and damaging propellers and rudders of boats.

### What's being done?

Federal, state, tribal, and local governments, NGOs, and grassroots organizations and individuals are collaborating to protect and restore Washington marine resources by locating and removing harmful commercial derelict fishing gear.

### How can you help?

Record as much information as you can when you find commercial derelict gear, including:

- Date of sighting
- Type of gear
- Approximate water depth

- General location
- Latitude (example 48.34333)
- Longitude (example -123.00333)

You can report this information to: Washington Department of Fish and Wildlife (Toll Free) 855-542-3935 or go to https://wdfw.wa.gov/fishing/derelict Northwest Straits Marine Conservative Initiative 360-733-1725 or go to www.derelictgear.org

# PROTECT 'ASHINGTON'S CKFISH

Rockfish are an incredibly diverse and important group of marine fish in our Pacific waters. A number of species are in low abundance in both Puget Sound and the Washington coast. To aid their recovery, fisheries in these areas have ended or been restricted. Read on to learn how you can help conserve Washington's rockfish.

See the WDFW web page for more information: https://wdfw.wa.gov/fishing/bottomfish/rockfish/mortality.html

# **IDENTIFY AND REPORT**

CANARY Lateral line in clear gray 3 orange stripes zone & orange mottling. across head.

YELLOWEYE Brilliant yellow eye & raspy ridges above eye.

Fins usually have black edges.

& elongated body.

Reddish & mottled with gray.

Rockfish can be challenging to identify. Anglers are encouraged to learn key features and use picture references to aid identification. Accurately identify and report all caught & released rockfish. Data from recreational anglers are critical to scientific evaluations that determine population health. Report all rockfish caught and

released to WDFW port samplers. Support rockfish conservation. Be an informed angler; support the continued survival of rockfish by knowing how to properly identify, report, and, if necessary, release these species.

As fish are brought to the surface, gases in the swim bladder expand causing the stomach and eyes to bulge. This is known as barotrauma.

Notice the everted stomach and bulging eyes.

Sending fish with barotrauma to their caught depth recompresses them, improving their ability to stay down.

There are several devices that you can use:

### DEPTH PRESSURE RELEASE

These devices grasp the fish on the jaw and release automatically once your desired depth is reached.

# INVERTED HOOK

An inverted barbless hook is inserted in the lower lip. Once back to depth, release the fish with a sharp jerk on the line.

### BOTTOM CONTACT RELEASE

A weight secures the grip as the fish descends. Once the weight contacts the sea floor, it releases the fish.

### DO NOT VENT

Puncturing the fish's swim bladder or bulging organs is not recommended as it can cause serious injury or introduce infection.

# Protect sensitive species by avoiding them-

if you are fishing in an area where you are catching fish you can't keep, it's best to move to another location.

### Get the rockfish down quickly-

have your descending device ready to use. Fish returned to depth within 2 minutes have a much better chance of survival.

### Avoid rough handling-

avoid dropping fish; touch fish as little as possible. Use a wet towel or wet your hands to avoid removing the protective slime coat.

- Return fish back to the depth of capture or at least 60 feet.
- Use the descending device that works for youconsider the fishing location, depth, and type of boat you have.

# Shellfish/Seaweed Rules

Note: For current clam, oyster, and mussel beach seasons check wdfw.wa.gov/shellfish/beaches, the Shellfish Emergency Rule Change Hotline (866) 880-5431, or contact the WDFW customer service desk (360) 902-2700 to verify seasons. **RAZOR CLAM** seasons occur only after clam samples have been tested by Washington Department of Health (DOH) and are found to be safe for human consumption. See page 128.

# 3 Steps to Safe and Legal Shellfish Harvest - It's your responsibility!

Know the Rules (You could get a ticket)

Is the harvesting season open? Read the rules for seasons, size, and bag limits. For beach seasons, check the website wdfw.wa.gov/fishing/shellfish/beaches, the toll-free WDFW Emergency Rule Change hotline (866) 880-5431 or contact the WDFW customer service desk (360) 902-2700 to verify seasons. A chart of current seasons can be downloaded here: wdfw.wa.gov/fishing/shellfish/beaches/WDFWBeachSeasonsBarChart.pdf

• Pollution Closures (You could get sick)

Does the beach meet standards for healthy eating? Some closures and advisories are shown on page 127. For more detailed information and current updates visit the Washington Department of Health website at doh.wa.gov/shellfishsafety.htm, call (360) 236-3330 or the local health department. County health department phone numbers are published in the government pages of local telephone directories.

• Marine Biotoxin Closures and Vibrio Warnings (You could get sick or die) Is there an emergency closure due to Shellfish Poisoning (PSP/ASP/DSP) or Vibrio bacteria? Water quality conditions can change

quickly. On the day you plan to harvest, check the DOH website at doh.wa.gov/shellfishsafety.htm, call (360) 236-3330, or the Shellfish Safety toll-free Hotline at (800) 562-5632.

Two different state agencies are responsible for two different types of recreational shellfish harvest closures. The Washington Department of Fish and Wildlife (WDFW) is responsible for conservation closures or season adjustments. These closures are designed to protect and conserve intertidal shellfish populations. The Washington Department of Health (DOH) is responsible for human health-related closures in response to potentially life-threatening environmental conditions, which result from PSP/ASP/DSP, Vibrio bacteria or pollution, as described in the Shellfish Safety section on the next page. Permanent WDFW/DOH closures and periodic DOH harvest advisories are shown on page 127.

DOH SEASON	WDFW SEASON	HARVEST STATUS	REASON
Open	Open	SAFE & LEGAL	
Open	Closed	ILLEGAL	Conservation closure or season adjustment
Closed	Open	NOT SAFE	Potentially life-threatening environmental conditions
Closed	Closed	NOT SAFE & ILLEGAL	

# Licenses

A Combination or a Shellfish/Seaweed License is required for all shellfish (except CRAWFISH) and SEAWEED harvest. A catch record card, and endorsement is required to fish for DUNGENESS CRAB in Puget Sound. (See License Requirements, page 6).

# Possession Limit

One daily limit in fresh form. Additional shellfish may be possessed in frozen or processed form.

# Designated Harvesters

Persons with a disability must have a designated harvester companion card issued by WDFW if using another harvester to assist them with their catch. The person harvesting the catch on behalf of the licensee with a disability must be in possession of the designated harvester companion card while assisting the person with a disability. Both the harvester and the person with a disability must be licensed. The licensee is also required to be in the direct line of sight of the designated harvester who is harvesting shellfish for them. If this is not possible, the licensee is required to be within 1/4 mile of the designated harvester who is harvesting shellfish for them.

# Tideland Ownership

Most Puget Sound, Hood Canal, Grays Harbor, and Willapa Bay beaches are privately owned. SHELLFISH and SEAWEED may not be taken from private beaches without the owner's or lessee's permission. Private tideland owners and lessees, and members of their immediate family (grandparents, parents, spouse, siblings, children, and grandchildren) are exempt from personal use daily limits when taking CLAMS OYSTERS, and MUSSELS harvested for their own personal use from their own tidelands. Daily limits apply for all other shellfish, all other people, and all other beaches. Everyone harvesting shellfish in excess of the daily limit from private beaches for presumed commercial purposes needs a shellfish certification from the Department of Health (see RCW 69.30.010(8)).

# **Octopus Protection** Areas

For OCTOPUS Protection Areas, see Marine Area maps (pages 110-122) for closures: AREA 8-1: Deception Pass

AREA 10: Alki Beach Junk Yard, and Seacreast Park Coves 1, 2, and 3. AREA 11: Three Tree Point. Redondo Beach, and Les Davis.

AREA 13: Days Island.

# Marine Preserves, Conservation & Areas

For all Shellfish Species, see Marine Area maps (pages 99-122) for closures:

AREA 7: San Juan Islands Marine Preserve. AREA 9: Edmonds Public Fishing Pier, Brackett's Landing Shoreline Sanctuary, Keystone Conservation Area, and Admiralty Head Marine Preserve.

AREA 10: Elliott Bay Public Fishing Pier, Orchard Rocks Conservation Area, Carkeek Park, Golden Gardens, Discovery Park, Richey Viewpoint, Emma Schmitz Memorial, Lincoln Park, and Eagle Harbor

AREA 11: Des Moines Fishing Pier, Les Davis Fishing Pier, Colvos Passage Marine Preserve, City of Des Moines Park, and South 239th Street Park, and Saltwater State Park Marine Preserve

AREA 12: Sund Rock Conservation Area. Waketickeh Creek Conservation Area, and Octopus Hole Conservation Area.

AREA 13: Saltar's Point Conservation Area, Titlow Beach Marine Preserve, and Z's Reef Marine Preserve

# Shellfish Safety Information

Eating contaminated shellfish or seaweed can cause serious illness or death. The only way to be safe is to "Know Before You Dig". Always check for current beach closures and advisories related to biotoxins, pollution, or other human health concerns the same day you plan to harvest: doh.wa.gov/shellfishsafety (clickable map), or call the Department of Health at (360) 236-3330 or the local county health department. For biotoxin information only, call the toll-free Biotoxin Hotline at 1-800-562-5632. In addition, some beaches may be posted with warning signs - look for signs as you access the beach.

ALWAYS CHECK BOTH THE CURRENT WDFW SEASON AND THE DOH HEALTH CLOSURE STATUS BEFORE HARVESTING ANY PUBLIC BEACH

# **Biotoxin Closures**

Don't harvest in areas with marine biotoxins, also known as "Red Tide". You could get sick or die

PARALYTIC SHELLFISH POISONING (PSP) & AMNESIC SHELLFISH POISONING (ASP) & DIARRHETIC SHELLFISH POISONING (DSP):

- · Can make you sick or cause death
- · Can't be destroyed by cooking or freezing
- · Are produced by algae that usually can't be seen
- · Do not turn the water red like the old name suggests

# Pollution Closures

Don't harvest in areas that are polluted. You could get sick.

Pollution can come from many sources like sewage drain pipes, failing septic systems, farm practices, boats, and pet waste. Some closures and advisories are listed on page 127. Visit doh.wa.gov/shellfishsafety for the current beach status.

# Vibrio Warnings

Be aware of Vibrio Warnings. You could get sick.

### **VIBRIO BACTERIA:**

- Cook all shellfish thoroughly to kill the bacteria and to avoid getting sick
- · Highest risk from May-September, especially in Puget Sound and Hood Canal
- Are naturally occurring bacteria that can multiply rapidly in warm conditions

# Help Keep Our Waters Safe and Clean

Human and pet waste can make people sick and cause harvest closures. Please do your part to protect our waterways and shellfish beaches:

- Use public toilets. Scoop, bag and trash human waste if no facilities are available.
- Scoop, bag, and trash your pet's waste.
- Pump, don't dump! Use pumpout stations to dispose of boat sewage. Visit pumpoutwashington.org.

# **Safe Handling Practices**

- Water color does not indicate SHELLFISH safety.
- Rinse your catch in salt (not fresh) water before leaving the beach, quickly cool your catch on ice or in a refrigerator, and cook as soon as possible.
- · Wash all SEAWEED before eating.
- Cook shellfish thoroughly before eating.
- Cooking, rinsing, or freezing **DOES NOT** destroy all pollutants. CRAB can also concentrate pollutants in their internal organs (crab butter).
- Clean CRAB before cooking. Eat only the meat.

# Health Shellfish Are GOOD For You!

\*Protein-rich

\*Low-fat

\*Essential minerals

BUT. . . when gathering your own, remember the 3 C's of safe shellfish harvest:

Check - Chill - Cook!

# Check for:

- · Health closures and advisories (biotoxin, pollution, Vibrio) doh.wa.gov/ShellfishSafety.htm Harvesting closures (seasons, limits)
- wdfw.wa.gov/fishing/shellfish
- Signs on the beach: Follow posted warnings and closures, and respect private property

# Chill shellfish – it's important!

- · Harvest shellfish on the outgoing tide
- Put them on ice as soon as possible to prevent bacterial
- Keep them cold until they're ready to eat

# Cook shellfish in summer

- Vibrio illnesses occur during summer months
- To kill Vibrio bacteria cook shellfish to 145° F for at least 15 seconds
- Cooking does not destroy biotoxins

Ask your doctor before eating raw shellfish if you have any concerns about allergies, are taking medications, or have a weakened immune system (such as cancer, liver disease, or HIV). Shellfish are great and healthy food. Avoid illness – follow the 3 C's.

# Razor Clam Rules

AREA **SPECIES SEASON ADDITIONAL RULES** 

RAZOR CLAMS (Siliqua patula) Grows to 6"; fragile, thin elongated shells are covered with shiny, tan lacquer-like skin coating the shell. Found only on Pacific coastal beaches. Razor clam seasons occur only after clam samples have been tested for marine biotoxins by Washington Department of Health (DOH) and are found to be safe for human consumption.

COASTAL BEACHES RAZOR CLAMS

TO BE No min. size. Daily limit first 15 dug regardless of size or condition. Each limit ANNOUNCED must be in a separate container.

- May only be taken by hand, hand-operated shovel, or tube with a minimum outside diameter of 4" (4" x 3" if elliptical).
- All clams dug are part of digger's limit you may not return any razor clams to the beach or water.
- It is illegal to drive any vehicle or to lead or ride a horse on razor clam beds (westerly of a line 150' waterward of the extreme upper limit of the hard sand area). Pressure from weight of vehicles and digging action of horses' hooves cause clam mortality.

The person with a disability for whom razor clams are being dug must be in line of sight of the designated harvester or within 1/4 mile of the digging site. Both the digger and the person with a disability must be licensed. The person with a disability must have a designated harvester companion card. The designated harvester must have the designated harvester companion card in their possession while assisting the person with a disability. (See page 7).

### PERMANENT RAZOR CLAM RESERVE CLOSURES

(Areas marked with posts and signs)

Razor clam sanctuaries (Reserves) are 1/4 mile sections of coastal ocean beaches located on three beach areas that are used to assist in the management of the razor clam resource. The three areas are marked with metal posts and are signed to designate a "no digging" area. The three areas are:

Copalis Beach - from a point 0.4 miles south of the Ocean City approach (2nd Ave.) and extending south for 1/4 mile.

Twin Harbors Reserve - from the middle of the County Line Rd. approach south for ¼ mile.

Long Beach Reserve - beginning 2.7 miles north of the Oysterville approach and extending north for 1/4 mile.

# STOP! **ILLEGAL ABALONE HARVEST**

# ABALONE CANNOT BE LEGALLY HARVESTED

The fishery for pinto (aka northern) abalone has been closed since 1994 in order to reverse population declines. Éven with the closure, populations have continued to collapse. Between 1992 and 2017, monitored abalone populations have fallen by 97%. Efforts are underway to restore this important species and in order for restoration to succeed, we must protect all remaining wild abalone. A suite of partners has created a hatchery program to raise and outplant juvenile abalone, but this program relies on wild abalone as parents for hatchery production. Wild abalone, particularly those found in small groups or aggregations, are critical for natural spawning and recovery. Abalone are sensitive to any physical disturbance. If you see one, please do not disturb it. Pinto abalone are listed as a State Candidate Species, a State Species of Greatest Conservation Need and a federal Species of Concern.

CRAB See page 132 for crab harvest and 135 for crab gear rules.

# CRAYFISH (Crawfish)

ALL OPEN WATERS

NATIVE SPECIES (SIGNAL CRAYFISH) 1st Mon. in May-Oct. 31

Min. size 3½" from tip of rostrum (nose) to tip of tail. Daily limit 10 lbs in shell. All females with eggs or young attached must be immediately returned to the water unharmed. No Shellfish/Seaweed license is required. See gear rules on page 135.

NONNATIVE SPECIES

1st Mon. in May-Oct. 31 Must be kept in a separate container. Must be dead before being removed from riparian area (immediate vicinity of water body). No daily limit, size, or sex restrictions. No Shellfish/Seaweed license is required. See gear rules page 135.

There is only one native crayfish species in Washington – the SIGNAL CRAYFISH (Pacifastacus leniusculus). This species can be identified by its uniform brownish coloration, white or light coloration of the claw joint, and the smooth surface of its carapace and claws compared to that of nonnative species. Native crayfish are the only crayfish that may be removed from the vicinity of the waterbody alive. If you cannot positively identify your catch as a nonnative species, the daily limit and other restrictions listed above for native crayfish apply.

No pronounced bumps or distinct dark tips on claws.

Claws can range in color from blue or green with red underneath.

How to humanely kill and preserve crayfish

There are two important steps to killing a cravfish quickly and humanely. The first is to chill them in ice or ice slurry for 20-30 minutes, and the second is to pierce their head with a knife.

# Statewide Gear Rules - Crab, Shrimp and Crawfish

### Caution

The requirements below are the minimum established by law. At some locations currents may require the addition of weights to traps and the use of additional buoys to prevent the equipment from being lost. Refer to the individual species listings (crab, page 132; shrimp, page 134; and crawfish, page 130) for seasons and other harvest rules.

### **GENERAL GEAR RULES:**

May be harvested by hand or dipnet. Hand operated instruments may not penetrate the shell.

One star trap, one ring net, one castable snare, or one pot is considered one unit of gear. The maximum number of units of gear that may be fished per person is:

Puget Sound: (Marine Area 4, east of the Bonilla-Tatoosh line, and in Marine Areas 5-13).

**Shrimp:** Two pots per person, and no more than 4 shrimp pots may be onboard or fished by any one boat at a time. **Crab:** Two units of crab gear per person, and no limit on the number of units of crab gear per boat.

Coastal Waters: (Marine Areas 1-3 and in Marine Area 4, west of the Bonilla-Tatoosh line). Two units of crab and/or shrimp gear per person. Exception: Columbia River - three units of crab gear per person.

Freshwater: Crawfish: Five units of gear per person.

Every shellfish pot, ring net, or star trap left unattended in Washington waters must have its own buoy line and a separate buoy that is permanently and legibly marked with the owner's first name, last name, and permanent address (telephone number is voluntary). It is ILLEGAL to set or pull unattended shellfish gear with a buoy that does not have your name on it, and only one name and address may appear on each buoy. Any angler may assist the person whose name is on the buoy while he or she is pulling the pot. No fisher may set, or pull shellfish gear from a vessel, in Catch Record Card Areas 1-13, from one hour after official sunset to one hour before official sunrise. All shellfish gear must be removed from the water on closed days.

Buoys must be constructed of durable material (no bleach, antifreeze, detergent bottles, paint cans, etc.) and must be visible on the surface at all times except during extreme tidal conditions. Personal flags and staff, if attached to buoys, can be of any color. Buoy lines must be weighted sufficiently to prevent them from floating on the surface.

All crab, shrimp, and crawfish pots must be equipped with a biodegradable device (rot/escape cord) and shall include one or more of the following:

(1) securing the pot lid hook or tie down strap with a single loop of cord; or

- sewing a 3" by 5" escape panel in the upper half of pot closed with cord; or
- attaching the pot lid or one pot side (serving as a pot lid) with no more than three single loops of cord.

Cord used must be untreated 100% cotton or other natural fiber no larger than thread size 120 (%"). This cord, when attached as described above, must be able to rot away and allow crab, shrimp, crawfish and fish to escape freely if the pot is lost. A derelict crab pot without proper escape cord can attract and kill crabs for years after the pot has been lost.

The minimum mesh size for crab pots is 11/2", and all pots must have two 41/4" minimum inside diameter escape rings in the upper half of the pot, except in the Columbia River where the minimum ring size is 4" inside diameter.

All parts of ring nets and star traps must lie flat on the sea bottom and may not restrict free movement of crab until lifted. Shellfish pots must be covered by water at all times while being fished.

Crab pots must not exceed 13 cubic feet.

All crab gear buoys must be half red and half white in color, and both colors need to be visible when fishing.

### SHRIMP GEAR:

Pots must be constructed of either flexible or rigid mesh material (no liners allowed).

Entrance tunnels can be made of any size mesh material but must be located on the sides of the pot. The sum of the maximum tunnel widths must not exceed one-half the perimeter of the bottom of the pot.

Shrimp pots must not exceed 10 feet in perimeter and 18" in height.

All shrimp pot buoys must be yellow in color.

### SHRIMP POT MESH SIZE:

### 1" Minimum Mesh Size

A 1/8" square peg must be able to pass through each mesh opening – see diagram, except for flexible (web) mesh pots, where the opening must be a minimum of 1 3/4" stretch measure.

### **Puget Sound:**

Required for all shrimp pots during the month of May.

Required in all areas open for spot shrimp after June 1st.

Pacific Ocean:

Year-round in waters seaward of 20 fathoms.

### 1/2" Minimum Mesh Size

A 3/8" square peg must be able to pass through each mesh opening, except for flexible (web) mesh pots, where the opening must be a minimum of 11/8" stretch measure.

### Puget Sound:

Allowed after June 1st in any area closed for spot shrimp, but open for coonstripe and pink shrimp.

### Pacific Ocean:

Year-round in waters shoreward of 20 fathoms.

### LOST GEAR:

Do not attempt to retrieve your lost shellfish gear without first getting permission from the WDFW Enforcement Program (360) 902-2936. Permission may be granted verbally or by a permit to retrieve <u>your gear</u>. Salvaging gear belonging to others requires a permit. To report lost shellfish gear, use the Online Reporting Tool https://wdfw.wa.gov/enforcement/lost\_gear/ or call WDFW at 1-855-542-3935. If we can recover your gear and it is properly identified, we will attempt to return it.
